

Xian Teng

✉ xit22@pitt.edu, xianteng.buaa@gmail.com 🌐 xit22penny.github.io 📄 xit22penny

Research Interest

My research lies in the fields of data science, network science, computational social science, and machine learning. I am motivated to understand dynamics and heterogeneity in complex social systems, and to support data-driven decisions for social good. I use methods including network analysis and modeling, statistical analysis and causal inference, data mining and machine learning techniques.

Education

University of Pittsburgh

PH.D. IN INFORMATION SCIENCE

- Advisor: Dr. Yu-Ru Lin, PITT Computational Social Dynamics Lab
- Cum. GPA: 3.94/4.00

Pittsburgh, USA

May 2016 – Now

Beihang University (BUAA)

MASTER IN MATHEMATICS, BACHELOR IN AUTOMATION SCIENCE

- Advisor: Dr. Zhiming Zheng, School of Mathematics and System Sciences
- Cum. Master GPA: 3.78/4.00, Cum. Bachelor GPA: 3.70/4.00

Beijing, China

Sep 2008 – Jun 2015

Experience

Facebook, Inc.

SOFTWARE ENGINEERING

- Supervisor: David Vickrey
- Project: Understanding the Patterns of Page Popularity Dynamics in Facebook Platform
- Study the dynamic patterns of pages' popularity (described by viewport views) from both system level and individual level; Understand the relationship between page popularity and page quality signals, which can be used for fighting against low-quality pages (spams, clickbait etc).

Menlo Park, USA

May 2019 – Aug 2019

Samsung Research America

RESEARCH INTERN

- Mentor: Rui Chen, Samsung Pay Data Science Group
- Project: Detection, Tracking and Prediction of User Intent by Mining Online Browsing Data

Mountain View, USA

May 2018 – Aug 2018

The City College of New York

RESEARCH INTERN

- Advisor: Hernan Makse, Complex Networks and Data Science Lab, Levich Institute
- Project: Identifying Influential Spreaders in Spreading Dynamics in Large-Scale Networks

New York City, USA

Jun 2015 – Apr 2016

Publication

Research Project

Assessing the Offline Risk of COVID-19 from Online Misinformation in the United States

Pittsburgh, USA

PITT COMPUTATIONAL SOCIAL DYNAMICS LAB

Jan 2020 - Now

- Study the risk of social media misinformation on mobility reduction in the United States in 2020;
- Combine daily, county-/state-level data on misinformation engagement from over 242 million tweets, movement changes across different places (e.g., recreation, grocery, and workplaces), non-pharmaceutical interventions (NPIs), and COVID-19 confirmed cases and deaths, along with county-/state-level census data on population demographics and presidential election results;
- Design a causal analysis framework to answer question: whether online misinformation exposure affect people’s compliance with social distancing offline (and to what extent)?

Battling COVID-19 Misinformation via Characterizing Susceptible Users

Pittsburgh, USA

PITT COMPUTATIONAL SOCIAL DYNAMICS LAB

Apr 2020 – Dec 2020

- Using a 6-month longitudinal user panel on Twitter collected from a geopolitically diverse context in US, we distinguish different types of users, ranging from social bots to humans with various level of engagement with COVID-related misinformation;
- Identify users’ online features that correlate with their susceptibility to COVID-19 misinformation;
- Using an interpretable deep learning model, we demonstrate a feasible solution to efficiently predict users’ transient susceptibility solely based on their short-term news consumption and exposure from their networks.

Disease Progression Modeling and Forecasting

Pittsburgh, USA

PITT COMPUTATIONAL SOCIAL DYNAMICS LAB

Dec 2017 – Dec 2018

- Model sequential medical data of patients to provide early and accurate prognosis for progressive diseases, including Alzheimer's disease and Parkinson's disease;
- Proposed a novel approach that captures the temporal uncertainties in patients' disease progressions and offers multiple predictions about a patient's future health with a certain level of confidence.

Anomaly Discovery in Dynamic Networks

Pittsburgh, UAS

PITT COMPUTATIONAL SOCIAL DYNAMICS LAB

Nov 2016 – Dec 2017

- Identify anomalous situations in complex networked systems that are composed of lots of interdependent and time-varying components;
- Develop novel unsupervised machine learning methods, which not only deliver warning signals about anomalous situations, but also provide transparency about how the anomalies deviate from normalcy for designing timely and appropriate intervention.

Identification of Influential Spreaders in Networks

New York City, USA

LEVICH INSTITUTE, CITY COLLEGE OF NEW YORK

Jun 2015 – Apr 2016

- Find the most influential entities in a network whose elimination can induce network collapse, or whose activation might promote maximal spread of information, namely optimal Collective Influence (CI);
- Conduct social media data analysis to validate CI's efficiency against several heuristic algorithms e.g., PageRank, adaptive high-degree, K-shell method.

Collective Behaviors & Social Wealth in Public Goods Games

Beijing, China

SCHOOL OF MATHEMATICS AND SYSTEMS SCIENCE, BEIHANG UNIVERSITY

Sep 2012 – Sep 2013

- Investigate individuals' competitive and cooperation behaviors in public goods games when they are set in structured networks to indicate their limited relationships with neighbors;
- Study the wealth distribution of structured population and reduce social inequality.

Alpha Magnetic Spectrometer 02 Experiment

Genève, Switzerland

EUROPEAN ORGANIZATION FOR NUCLEAR RESEARCH (CERN)

Mar 2012 – Jun 2012

- Develop computational and statistical techniques for particle discrimination, i.e. to distinguish positrons against protons with relatively low deviations.

Talks & Presentations

- 2021 *Assessing the Offline Risk of COVID-19 from Online Misinformation in the United States* Politics and Computational Social Science 2021 (PaCSS), Virtual Event, August 9-13, 2021.
- 2020 *Characterizing User Susceptibility to COVID-19 Misinformation on Twitter* Politics and Computational Social Science and Political Networks Conference 2020 (PaCSS & PolNet 2020), Virtual Event, August 10-14, 2020.
- 2019 *Stochastic Progression Forecasting for Alzheimer's and Parkinson's Diseases*. Modeling the World's Systems Conference, Washington D.C., USA, May 13-15, 2019.
- 2018 *Deep into Hypersphere: Robust and Unsupervised Anomaly Discovery in Dynamic Networks*. International Joint Conference on Artificial Intelligence & European Conference on Artificial Intelligence (IJCAI-ECAI), Stockholm, Sweden, July 13-19, 2018.
- 2018 *Anomaly Detection in Dynamic Networked Systems*. Sky Talks Series, School of Computing and Information, University of Pittsburgh, Pittsburgh, USA, March 21, 2018
- 2017 *Anomaly Detection in Dynamic Networks using Multi-View Time-Series Hypersphere Learning*. International Conference on Information and Knowledge Management (CIKM), Singapore, November 6-10, 2017.
- 2017 *Anomaly Detection in Dynamic Networks*. Dalian University of Technology, Dalian, China, June 16, 2017.

Honors & Awards

- 2018 Grace Hopper Celebration (GHC) Scholarship
- 2018 Graduate Student Travel Award, University of Pittsburgh
- 2017 US NSF and SIGWEB Travel Award
- 2017 SIGIR Student Travel Grant
- 2017 Graduate Student Travel Award, University of Pittsburgh
- 2014 National Scholarship for Graduate Students, Beihang University (Top 2%)
- 2012 First Prize Scholarship for Graduate Students, Beihang University (Top 5%)

Academic Services

ORGANIZER

- PittCSS Computational Social Science seminar 2021-2022
- PICSO lab seminar series 2016-2019

REVIEWER

- Palgrave Communication
- Neural Computing and Application
- Journal of Statistical Mechanics: Theory and Experiment
- Physica A: Statistical Mechanics and its Applications
- International Conference on Information and Knowledge Management
- Jordadian Journal of Computers and Information Technology

PROGRAM COMMITTEE

- International Conference on Social Informatics (SocInfo'19, SocInfo'18, SocInfo'17)
- Annual International Conference on Computational Social Science (IC2S2'18)

Teaching

Teaching assistant - Data Mining (2017 Spring, 2018 Spring/Fall, 2020 Fall, 2021 Fall)

Teaching assistant - Data Analysis (2021 Fall)

Teaching assistant - Introduction to Information System (2016 Fall)
